CRESTRON®

A smart workplace starts with a smart scheduling system

The modern workplace is fast-paced, flexible, and dispersed. With touch screens, scheduling software, and illuminated room availability indicators, Crestron provides everything you need to make everyone more efficient, connected, and collaborative across all meeting spaces.

① Touch screens

Choose from a range of secure, enterprise-grade, PoE touch screens with versatile mounting options. 5″, 7″, and 10″ available.

② Room availability indicators

All it takes is a quick glance down the hallway to determine the status of meeting rooms.

Room Availability Light Bar

Room Availability Sign - Ceiling Mount

Room Availability Sign - Wall Mount

Room Availability Status Indicator - Wall Mount
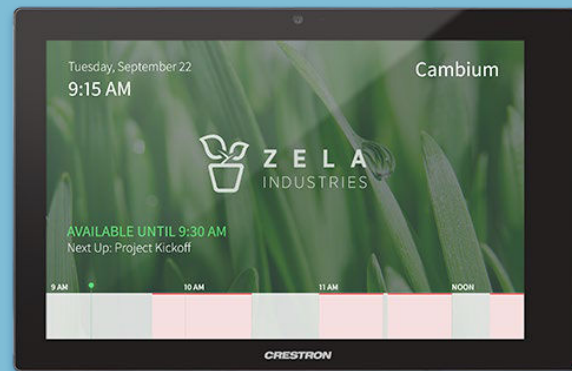

③ Optimize your in-room experience

AirMedia® 2.0 technology shows meeting details on the room display, so you'll always know if you're in the right place at the right time. When not in use for meetings, you can leverage AirMedia for digital signage.

Flexible. Scalable. Secure. Customizable.

With the powerful Crestron scheduling platform and touch screens, anything is possible.

Meeting information

Immediately see if the room is booked and for how long.

Power at your fingertips

Advanced functionality menu lets you check-in, extend the current meeting, end the meeting early, and more.

Conference Room 231 — Tuesday, September 22 | 9:15 AM

AVAILABLE FOR NEXT

9 AM   10 AM   11 AM   NOON

CRESTRON

Custom GUI

Unique backgrounds, logos, and color schemes can be implemented to reinforce your branding.

High Visibility GUI

High-contrast screen changes colors to enhance accessibility (WCAG 2.0 part 1.4.6 for Contrast (Enhanced)).

Reserve on the spot, on the app, or at your desk

Quickly book an available room in two taps. Built-in Crestron scheduling software directly connects to the most popular calendaring platforms:
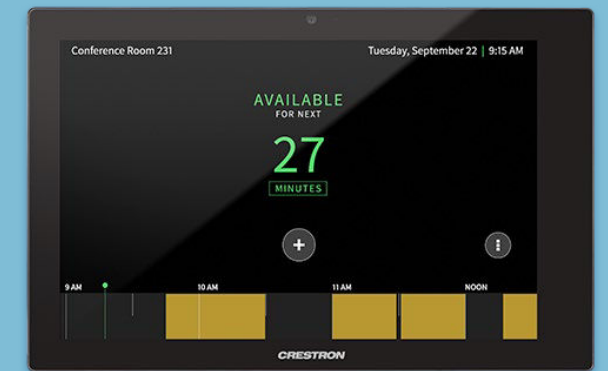

Exchange | Office | G Suite

Choose the application that's right for you

Our open architecture allows you to run standard Crestron software or one of our partners' applications.

teem | Robin | EMS an accruent company | GINGCO.NET

APPSPACE | SharingCloud | zoom | SPACE CONNECT

nfs technology group

Transform every space into a productive meeting space

Meeting spaces have evolved beyond the traditional conference room. Crestron provides flexible solutions to easily add wireless presentation, digital signage, and scheduling capabilities in all the places people meet. All that's needed is a display.

Open spaces

Nothing brings productivity to a screeching halt like not having a place to meet. With Crestron, teams can gather anywhere there's an available display – lobbies, stand-up tables, cafeterias, and more.

Non-reservable spaces

Some meeting spaces are used without scheduling, but people still need to find them easily. With an occupancy sensor driving a room availability indicator, these spaces suddenly become easy to find.

# Deploy and evolve room scheduling from the Cloud

With Crestron XiO Cloud™ you can securely deploy and evolve Crestron room scheduling technology anywhere in the world through a standard web browser.
